### Activity B

Play a game as a group. Sit in a circle and decide who starts. The first person chooses a shop, etc. from A, and something you can get there, and says a sentence with the following pattern: *I went to the \_\_\_\_\_'s and I got \_\_\_\_\_*, for example *I went to the optician's and I got some contact lenses*. The next person in the circle then has to repeat the sentence and add one of their own, for example: *I went to the optician's and I got some contact lenses, then I went to the newsagent's and I got a magazine*. The next person repeats both these sentences and adds one, and so on, so that each person has to remember more and more. Anyone who makes a mistake is out of the game, and the winner is the last person left in.
