14 Similes in idioms

Activity A

In descriptions, we use similes to compare one thing to another in order to provide a clear picture of what we are describing and to emphasize the adjective we are using. There are different ways to structure a simile but the following activity focuses on 'as' + adjective + 'as' + noun. An example would be *That story is as old as the hills* meaning that the story being described is incredibly old. We use these similes in an idiomatic way and therefore they are not easy to translate. Match the two halves of the idioms then check your answers in the dictionary.

Match the beginning of each sentence with the best ending:
